Water Pressure (PSI)	15 – 120
Integral Air Gap on Supply	Yes
Voltage Rating	120V/60Hz/15A
Connected Load (kW Rating) @ 120 Volts‡	1.44
Amps @ 120 Volts	9.0
Shipping Weight (Approx.)	115 Lbs.

**Dishwasher designed to also accept custom door panel to match with custom cabinetry. (Refer to Custom Panel Specifications.)*

‡ For use on adequately wired 120V, dedicated circuit having 2-wire service with a separate ground wire. Appliance must be grounded for safe operation.

NOTE: Always consult local and national electric and plumbing codes. Refer to Product Installation Guide for detailed installation instructions on the web at electroluxicon.com.

Specifications subject to change.

Built-In Dishwasher Specifications

- Product Weight – 93 Lbs.
- Voltage Rating @120V/60 Hz/15 Amps
- Connected Load (kW Rating) @120 Volts = 1.44 kW
  (For use on adequately wired 120V, dedicated circuit having 2-wire service with a separate ground wire. Appliance must be grounded for safe operation.)
- Amps @120V = 9 Amps
- Always consult local and national electric & plumbing codes.
  Meets requirements of ASSE 1006.
- Water Pressure – Hot water line to dishwasher must provide between 15 and 120 pounds per square inch (psi).
- Make sure location has right drain, water and electrical outlets to make connections.
- Keep back free of drain, water & electrical supply.
- Electrical and water supplies should enter cabinet opening on floor, or through back or side walls, as shown in shaded areas.
- Connections preferably located toward left side of dishwasher. Do not cross drain, water or electrical lines in front of motor, blower or frame.
- Minimum clearance of 5/16" required from unit to underside of countertop.
- Leveling legs supplied to adjust height. *(Note: Height only adjustable to 34-11/16" max. when installed in 35" max. standard cabinetry cutout to allow for 5/16" min. clearance.)*
- When installing adjacent to wall, cabinet or other obstruction that extends beyond front edge of unit, allow 2" minimum clearance between opened door and obstruction.
- When installing at end of cabinet line, sides must be fully enclosed.
- Do not install unit under a cooktop, damage may occur.
- Dishwasher designed to also accept custom door panel to match with custom cabinetry. *(Refer to Custom Panel Specifications on this page.)*

Custom Panel Specifications

- Panel Dimensions – 30-1/8"H max. x 23-11/16"W x 3/4"D
- Panel Weight – 12 Lbs. max *(including handle)*
- Refer to web for detailed custom panel construction and installation instructions.

Note: For planning purposes only. Refer to Product Installation Guide on the web at electroluxicon.com for detailed instructions.

Meets requirements of ASSE 1006

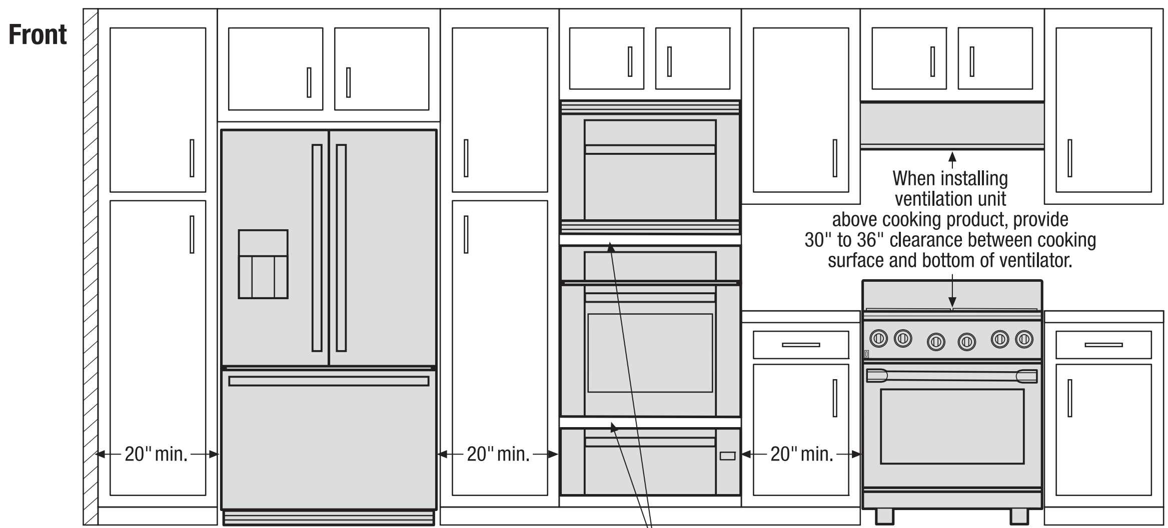

NSF Protocol for Sanitization and Cleaning Performance of Household Spray-Type Dishwashers (1997)

When installing appliances adjacent to each other, 20" minimum distance between each appliance required.

When installing built-in cooking appliances in combination, 2" minimum visible gap between appliance faceplates required.

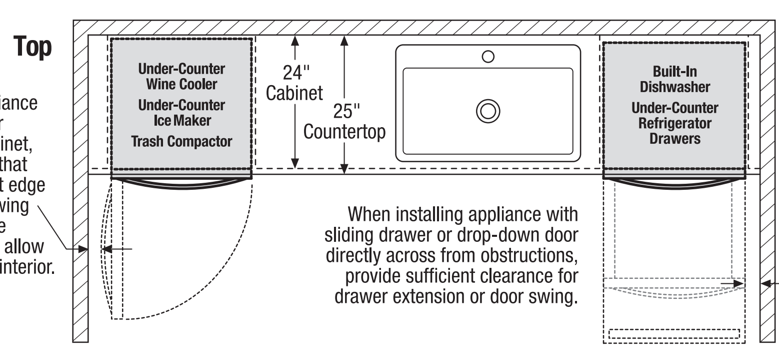

When installing refrigerator adjacent to wall, cabinet or another appliance that extends beyond front edge of unit, 20" minimum clearance recommended to allow for optimum 120° to 180° door swing, providing complete drawer/crisper access and removal.

When installing appliance with sliding drawer or drop-down door directly across from obstructions, provide sufficient clearance for drawer extension or door swing.

To ensure optimum performance, avoid installing refrigeration appliances in direct sunlight or near heat source.

When installing appliance with side-swing door adjacent to wall, cabinet, or other obstruction that extends beyond front edge of appliance, door swing and handle clearance must be sufficient to allow access to appliance interior.

When installing appliance with sliding drawer or drop-down door directly across from obstructions, provide sufficient clearance for drawer extension or door swing.

When installing appliance with sliding drawer or drop-down door adjacent to wall, cabinet, or other obstruction that extends beyond front edge of appliance, allow 2" minimum clearance between drawer or door and obstruction.
